

AWS Backend Director (m/f/d)

in Munich 📍

As a young startup dedicated to public transport, our vision is to make buying tickets as easy as possible for passengers. This is why we are developing a function that automatically detects the beginning and end of a journey on public transport. Based on the recognition, it is possible to provide the passenger with the cheapest ticket. Our goal – to improve the driving experience with public transport!

YOUR RESPONSIBILITIES:

- Understand the current application infrastructure and suggest changes to it
- Define and document best practices and strategies regarding application deployment and infrastructure maintenance
- Migrate our infrastructure with zero downtime to a highly available, scalable one
- Define service capacity planning strategies
- Implement the application's CI/CD pipeline using the AWS CI/CD stack
- Write infrastructure as code using CloudFormation or similar

YOUR PROFILE:

- Experience with the core AWS services (plus Cloudformation, API Gateway and VPC)
- Experience with Go, node.js & DevOps
- Strong notions of security best practices (e.g. using IAM Roles)
- Problem solver and critical thinker
- High degree of independence and initiative
- Active participation in product planning and development
- Ability to troubleshoot distributed systems
- Eager to learn about new technologies

WHY BLUEGO?

- Flexible working hours (work when you are most productive)
- Attractive remuneration
- Pleasant working environment
- Plants and couch in the office
- Opportunity to assume responsibility

At BlueGo you can bring your comprehensive knowledge to bear in a open-minded environment and develop yourself further. We are the right place for you if you want to play a leading role in a promising project and have a very independent way of working.
