

Geo Backend Director (m/f/d)

in Munich 📍

As a young startup dedicated to public transport, our vision is to make buying tickets as easy as possible for passengers. This is why we are developing a function that automatically detects the beginning and end of a journey on public transport. Based on the recognition, it is possible to provide the passenger with the cheapest ticket. Our goal – to improve the driving experience with public transport!

YOUR RESPONSIBILITIES:

As a Geo Backend Engineer, your mission is simple: You are responsible for the recognition of rides within traffic networks. You will play an important role at BlueGo and help make public transport ticketing a breeze.

YOUR PROFILE:

- Comprehensive knowledge of mathematics and physics
- Very fit in backend development
- Safe handling of geo-tools
- Experience with mobility projects
- Problem solver and critical thinker
- High degree of independence and initiative
- Active participation in product planning and development
- Eager to learn about new technologies

WHY BLUEGO?

- You take on a leading role in the project and can realize yourself
- Flexible working hours (work when you are most productive)
- Attractive remuneration
- Pleasant working environment
- Plants and couch in the office
- Opportunity to assume responsibility

At BlueGo you can bring your comprehensive knowledge to bear in a open-minded environment and develop yourself further. We are the right place for you if you want to play a leading role in a promising project and have a very independent way of working.
